NFIB SMALL BUSINESS ECONOMIC TRENDS

NFIB Research Center has collected Small Business Economic Trends Data with Quarterly surveys since 1973 and monthly surveys since 1986. The sample is drawn from the membership files of the National Federation of Independent Business (NFIB). Each was mailed a questionnaire and one reminder. Subscriptions for twelve monthly SBET issues are \$250. Historical and unadjusted data are available, along with a copy of the questionnaire, from the NFIB Research Center. You may reproduce Small Business Economic Trends items if you cite the publication name and date and note it is a copyright of the NFIB Research Center. © NFIB Research Center. ISBS #0940791-24-2. Chief Economist William C. Dunkelberg and Executive Director of the NFIB Research Center Holly Wade are responsible for the report.

SUMMARY

OPTIMISM INDEX

The Optimism Index decreased slightly in February by 1.4 points to 95.7, the second consecutive month below the 48-year average of 98. One of the 10 Index components improved, six declined and three were unchanged. Twenty-six percent of owners reported that inflation was their single most important problem encountered in operating their business, an increase of 4 points from December. This is the highest reading since Q3 1981. Owners expecting better business conditions over the next six months decreased 2 points to a net negative 35 percent. Inventory accumulation plans fell 1 percentage point, following a 5-point decline in January. The net percent of owners raising average selling prices increased 7 points to a net 68 percent seasonally adjusted, the highest reading in the series.

LABOR MARKETS

Forty-eight percent (seasonally adjusted) of all owners reported job openings they could not fill in the current period, up 1 point from January. The number of unfilled job openings remains far above the 48-year historical average of 23 percent. Thirty-seven percent have openings for skilled workers (up 1 point) and 25 percent have openings for unskilled labor (up 3 points). The difficulty in filling open positions is particularly acute in the transportation, construction, and wholesale sectors where many positions require skilled workers. Openings are lowest in the finance and agriculture sectors. Owners' plans to fill open positions remain elevated but easing, with a seasonally adjusted net 19 percent planning to create new jobs in the next three months, down 7 points from January. Fifty-seven percent (93 percent of those hiring or trying to hire) of owners reported few or no qualified applicants for the positions they were trying to fill (up 2 points). Thirty-one percent of owners reported few qualified applicants for their open positions (up 2 points) and 26 percent reported none (unchanged).

CAPITAL SPENDING

Fifty-seven percent reported capital outlays in the last six months, down 1 point from January. A recovery in investment will be needed to spark an improvement in productivity, but this is unlikely to occur while owners remain pessimistic about future business conditions. Of those making expenditures, 41 percent reported spending on new equipment (up 1 point), 21 percent acquired vehicles (down 1 point), and 14 percent improved or expanded facilities (down 1 point). Seven percent acquired new buildings or land for expansion (down 1 point) and 11 percent spent money for new fixtures and furniture (down 4 points). Twenty-seven percent plan capital outlays in the next few months, down 2 points from January. A more positive view of the future economy and economic policy would help stimulate longer term investment spending, but currently, owner views about the future are not supportive.

SALES AND INVENTORIES

A net zero percent of all owners (seasonally adjusted) reported higher nominal sales in the past three months, down 2 points from January. Over 60 percent of owners are experiencing lost sales opportunities. The net percent of owners expecting higher real sales volumes decreased by 3 points to a net negative 6 percent. The net percent of owners reporting inventory increases fell 4 points to a net 5 percent, an historically strong figure. Not seasonally adjusted, 18 percent reported increases in stocks while 18 percent reported reductions. Thirty-seven percent of owners report that supply chain disruptions have had a significant impact on their business (up 1 point). Another 33 percent report a moderate impact and 21 percent report a mild impact. Only 8 percent report no impact from recent supply chain disruptions. A net 7 percent of owners viewed current inventory stocks as “too low” in February, unchanged from January. A net 2 percent of owners plan inventory investment in the coming months, down 1 point from January.

COMPENSATION AND EARNINGS

Seasonally adjusted, a net 45 percent reported raising compensation, down 5 points from January’s 48-year record high reading. A net 26 percent plan to raise compensation in the next three months, down 1 point from January, but historically high. Eleven percent cited labor costs as their top business problem, unchanged from January’s 48-year record high reading, and 22 percent said that labor quality was their top business problem (down 1 point). The frequency of reports of positive profit trends was a net negative 17 percent, unchanged from January.

CREDIT MARKETS

Two percent of owners reported that all their borrowing needs were not satisfied (down 1 point). Twenty-five percent reported all credit needs met (unchanged) and 60 percent said they were not interested in a loan (down 2 points). A net 2 percent reported their last loan was harder to get than in previous attempts (unchanged). Zero percent reported that financing was their top business problem (down 1 point). A net 6 percent of owners reported paying a higher rate on their most recent loan, up 2 points from January. The average rate paid on short maturity loans was 5.68 percent, down 0.66 points from January.” Twenty-three percent of all owners reported borrowing on a regular basis (unchanged).

INFLATION

The net percent of owners raising average selling prices increased 7 points to a net 68 percent seasonally adjusted, the highest reading recorded in the series. Unadjusted, 4 percent (down 1 point) reported lower average selling prices and 68 percent (up 6 points) reported higher average prices. Price hikes were most frequent in retail (79 percent higher, 4 percent lower), wholesale (77 percent higher, 4 percent lower), construction (73 percent higher, 3 percent lower), and manufacturing (72 percent higher, 6 percent lower). Seasonally adjusted, a net 46 percent plan price hikes (down 1 point).

COMMENTARY

Here's a simplified description of events that led up to the current period. In early 2020, the economy was smacked by Covid. With no medicines and little experience in treating the virus, many died. To thwart the spread of the virus, government shut down all non-essential businesses. With millions of workers deprived of an income, the government mailed them checks and generous unemployment benefits. Flush with money, they went on a spending spree, focused on goods, not services since "foot traffic" businesses were not safe, but the internet was, heavily relying on "essential" delivery services.

The usual way we get money is to make and sell something or provide a service, creating output that consumers buy. But this time, millions of people were not working but got the money anyways and to no surprise, they spent it, especially on goods because the virus shut down a lot of the service sector. Domestic firms were short on goods, so imports rose significantly, some of it piled up on ships waiting to unload in overworked ports. All that money chasing too few goods created inflation. The Federal Reserve contributed to the problem by keeping interest rates at absurdly low levels, so consumers and businesses had access to very cheap money, borrowed it, and spent it. This spending included real estate thus a 20% increase in house prices last year with very low mortgage rates spurring demand for example.

Shortages of goods and materials created an environment of price hikes. Indeed, a record high percentage of owners report raising compensation and a slightly larger percentage report raising selling prices. President Biden's State of Union Address offered his solution to our problems: "lower your costs, not your wages." For so many firms, labor costs are the largest cost in their business. Compensation has been rising at a favorable rate, but not as fast as inflation, so real wages are not rising as much.

The solution to many of these problems is to let private sector firms solve them in response to market signals like prices and profits. Rising prices are signals to resources to invest there, increase supply, and solve the rising price problem with increased supply (high oil prices have resulted in a sharp increase in the number of rigs producing oil for example). Eliminating regulations that impact important prices is also important. The Federal Reserve sets interest rates, not financial markets, minimum wage regulations reduce employment opportunities, if we tax something, we will get less of it. Programs that simply give people more money won't help and the government has no more money to give unless it taxes or borrows from the private sector. Let Main Street work, that's the most effective way to resolve these challenges.

NFIB RESEARCH CENTER SMALL BUSINESS ECONOMIC SURVEY

SMALL BUSINESS SURVEY QUESTIONS	PAGE IN REPORT
Do you think the next three months will be a good time for small business to expand substantially? Why?	4
About the economy in general, do you think that six months from now general business conditions will be better than they are now, about the same, or worse?	5
Were your net earnings or “income” (after taxes) from your business during the last calendar quarter higher, lower, or about the same as they were for the quarter before?	6
If higher or lower, what is the most important reason?	6
During the last calendar quarter, was your dollar sales volume higher, lower, or about the same as it was for the quarter before?	7
Overall, what do you expect to happen to real volume (number of units) of goods and/or services that you will sell during the next three months?	7
How are your average selling prices compared to three months ago?	8
In the next three months, do you plan to change the average selling prices of your goods and/or services?	8
During the last three months, did the total number of employees in your firm increase, decrease, or stay about the same?	9
If you have filled or attempted to fill any job openings in the past three months, how many qualified applicants were there for the position(s)?	9
Do you have any job openings that you are not able to fill right now?	10
In the next three months, do you expect to increase or decrease the total number of people working for you?	10
Over the past three months, did you change the average employee compensation?	11
Do you plan to change average employee compensation during the next three months?	11

SMALL BUSINESS SURVEY QUESTIONS	PAGE IN REPORT
Are...loans easier or harder to get than they were three months ago?	12
During the last three months, was your firm able to satisfy its borrowing needs?	13
Do you expect to find it easier or harder to obtain your required financing during the next three months?	13
If you borrow money regularly (at least once every three months) as part of your business activity, how does the rate of interest payable on your most recent loan compare with that paid three months ago?	14
If you borrowed within the last three months for business purposes, and the loan maturity (pay back period) was 1 year or less, what interest rate did you pay?	14
During the last three months, did you increase or decrease your inventories?	15
At the present time, do you feel your inventories are too large, about right, or inadequate?	15
Looking ahead to the next three months to six months, do you expect, on balance, to add to your inventories, keep them about the same, or decrease them?	15
During the last six months, has your firm made any capital expenditures to improve or purchase equipment, buildings, or land?	16
If [your firm made any capital expenditures], what was the total cost of all these projects?	17
Looking ahead to the next three to six months, do you expect to make any capital expenditures for plant and/or physical equipment?	17
What is the single most important problem facing your business today?	18
Please classify your major business activity, using one of the categories of example below	19
How many employees do you have full and part-time, including yourself?	19
