NFIB SMALL BUSINESS ECONOMIC TRENDS

NFIB Research Center has collected Small Business Economic Trends Data with Quarterly surveys since 1973 and monthly surveys since 1986. The sample is drawn from the membership files of the National Federation of Independent Business (NFIB). Each was mailed a questionnaire and one reminder. Subscriptions for twelve monthly SBET issues are \$250. Historical and unadjusted data are available, along with a copy of the questionnaire, from the NFIB Research Center. You may reproduce Small Business Economic Trends items if you cite the publication name and date and note it is a copyright of the NFIB Research Center. © NFIB Research Center. ISBS #0940791-24-2. Chief Economist William C. Dunkelberg and Executive Director of the NFIB Research Center Holly Wade are responsible for the report.

SUMMARY

OPTIMISM INDEX

The Optimism Index rose 0.6 points in November to 91.9. This is the eleventh consecutive month below the 49-year average of 98. The last time the Index was at or above the average was December 2021. Of the 10 index components, 6 increased and 4 decreased. Thirty-two percent of owners reported that inflation was their single most important problem in operating their business, 1 point below last month and 5 points lower than July's highest reading since 1979 Q4. Owners expecting better business conditions over the next six months improved 3 points from October to a net negative 43 percent, much less negative than June's reading of net negative 61 percent. Forty-four percent of owners reported job openings that were hard to fill, down 2 points from October. The net percent of owners raising average selling prices increased 1 point to a net 51 percent seasonally adjusted. The net percent of owners who expect real sales to be higher improved 5 points from October to a net negative 8 percent.

LABOR MARKETS

Forty-four percent (seasonally adjusted) of all owners reported job openings they could not fill in the current period, down 2 points from October. Thirty-seven percent have openings for skilled workers (down 3 points) and 16 percent have openings for unskilled labor (down 6 points). The difficulty in filling open positions is particularly acute in the transportation, wholesale, and construction sectors. Openings are lowest in the finance and agriculture sectors. Owners' plans to fill open positions remain elevated, with a seasonally adjusted net 18 percent planning to create new jobs in the next three months (down 2 points), although it is the lowest reading since January 2021. Fifty-four percent (92 percent of those hiring or trying to hire) of owners reported few or no qualified applicants for the positions they were trying to fill (down 1 point). Thirty-one percent of owners reported few qualified applicants for their open positions (up 1 point) and 23 percent reported none (down 2 points).

CAPITAL SPENDING

Fifty-five percent reported capital outlays in the last six months, up 1 point from October. Of those making expenditures, 39 percent reported spending on new equipment (up 2 points), 19 percent acquired vehicles (down 3 points), and 12 percent improved or expanded facilities (down 5 points). Eleven percent spent money for new fixtures and furniture (unchanged) and 5 percent acquired new buildings or land for expansion (down 1 point). Twenty-four percent plan capital outlays in the next few months, up 1 point from October. A more positive view of the future economy and economic policy would help stimulate longer term investment spending, but currently, owners' views about the future are not supportive. Investment is needed to address labor supply chain problems in the current environment. In addition, Federal Reserve actions will continue to raise interest rates, increasing the cost of financing capital projects and reducing the expected gains from investments.

SALES AND INVENTORIES

A net negative 7 percent of all owners (seasonally adjusted) reported higher nominal sales in the past three months, 1 point better than October. The net percent of owners expecting higher real sales volumes improved 5 points to a net negative 8 percent. The net percent of owners reporting inventory increases rose 6 points to a net 5 percent. Not seasonally adjusted, 19 percent reported increases in stocks and 14 percent reported reductions. Twenty-nine percent of owners recently reported that supply chain disruptions have had a significant impact on their business. Another 34 percent report a moderate impact and 26 percent report a mild impact. Only 11 percent report no impact from recent supply chain disruptions. A net negative 2 percent of owners viewed current inventory stocks as “too low” in November, down 2 points from October. A net negative 4 percent of owners plan inventory investment in the coming months.

COMPENSATION AND EARNINGS

Seasonally adjusted, a net 40 percent reported raising compensation, down 4 points from October. A net 28 percent plan to raise compensation in the next three months, down 4 points from October. Nine percent cited labor costs as their top business problem, down 1 point from October, and 21 percent said that labor quality was their top business problem (down 2 points). Labor quality remains in second place behind “inflation” by 11 points. The frequency of reports of positive profit trends was a net negative 22 percent, 8 points more positive than October. Among owners reporting lower profits, 29 percent blamed the rise in the cost of materials, 25 percent blamed weaker sales, 10 percent cited labor costs, 9 percent cited lower prices, 6 percent cited the usual seasonal change, and 3 percent cited higher taxes or regulatory costs.

CREDIT MARKETS

Two percent of owners reported that all their borrowing needs were not satisfied (unchanged). Twenty-two percent reported all credit needs met (down 4 points) and 62 percent said they were not interested in a loan (unchanged). A net 5 percent reported their last loan was harder to get than in previous attempts (down 1 point). Three percent reported that financing was their top business problem (up 2 points and the highest since December 2018). A net 23 percent of owners reported paying a higher rate on their most recent loan, up 1 point from October. The average rate paid on short maturity loans was 7.9 percent, the highest since March 2008. Twenty-seven percent of all owners reported borrowing on a regular basis (down 1 point).

INFLATION

The net percent of owners raising average selling prices increased 1 point from October to a net 51 percent seasonally adjusted. Unadjusted, 8 percent (unchanged) reported lower average selling prices and 56 percent (unchanged) reported higher average prices. Price hikes were most frequent in wholesale (73 percent higher, 0 percent lower), retail (69 percent higher, 7 percent lower), construction (66 percent higher, 5 percent lower), and manufacturing (63 percent higher, 5 percent lower). Seasonally adjusted, a net 34 percent plan price hikes (unchanged).

COMMENTARY

Forecasters have been predicting a recession since early in the year. The Small Business Optimism Index has been below its 49-year average all year and in historical recession territory most of that time, so small firms are forecasting a decline as well. But, everyone is not on board – yet. Consumer spending has been solid, most recently led by spending on new cars, now more available with the chip shortage fading, and supported by a declining saving rate out of an improving income, plus more credit use. Job creation is much lower than a year ago, but still solid while the labor force participation rate drifts lower. The Establishment Survey has reported job gains that are still positive, but trending down. The Household Survey continues to show employment declines, consistent with NFIB firms hiring reports.

The Leading Economic Indicators and the inverted yield curve clearly signal a recession ahead. The labor market is slowing but hasn't crashed. Sometimes recessions appear quickly, triggered by major events like a financial market collapse (2008) or a government shutdown (Covid). But more typically, the economy eases into recession. Responding to the Fed's interest rate policy does not happen quickly and the Fed does not reach its terminal policy rate level (about 5% expected) overnight. NFIB's leading economic indicator has never missed in 50 years, and it predicts a slowdown.

NFIB data suggest that inflation pressures are easing, with the percent raising selling prices falling from 71% early in the year to 56% in November. Over the same period, the percent cutting prices has doubled from 4% to 8%. The percent reporting higher labor compensation has decline from 50% to 39%, a reduction in the pressure to raise prices to cover costs. The percent of owners planning to raise prices averaged over 50% early in the year now stands at 35%. Inflation is fading on Main Street, but prices are still high and the percent still raising prices is too high to put inflation at the 2% Federal Reserve target. And, when inflation finally reaches the 2% level, the level of prices will still be much higher than they were a year or two years ago.

The election changed the distribution of power in Congress, giving Republicans a small majority in the House but leaving the Democrats in charge in the Senate. The government budget for next year must be approved this month (or we have a government shutdown). A sensible approach would be to decide how much in total taxpayers will be expected to pay for, leaving the details to committees to sort out. However, the process that seems to materialize is to ask everyone how much they want, add it up, approve it, and then figure out how to pay for it with tax revenues (never enough) and new borrowing. This popular legislative process unfortunately will add more to our national debt and servicing costs. We could do this much more sensibly.

SMALL BUSINESS SURVEY QUESTIONS	PAGE IN REPORT
Do you think the next three months will be a good time for small business to expand substantially? Why?	5
About the economy in general, do you think that six months from now general business conditions will be better than they are now, about the same, or worse?	6
Were your net earnings or "income" (after taxes) from your business during the last calendar quarter higher, lower, or about the same as they were for the quarter before?	7
If higher or lower, what is the most important reason?	7
During the last calendar quarter, was your dollar sales volume higher, lower, or about the same as it was for the quarter before?	8
Overall, what do you expect to happen to real volume (number of units) of goods and/or services that you will sell during the next three months?	8
How are your average selling prices compared to three months ago?	9
In the next three months, do you plan to change the average selling prices of your goods and/or services?	9
During the last three months, did the total number of employees in your firm increase, decrease, or stay about the same?	10
If you have filled or attempted to fill any job openings in the past three months, how many qualified applicants were there for the position(s)?	10
Do you have any job openings that you are not able to fill right now?	11
In the next three months, do you expect to increase or decrease the total number of people working for you?	11
Over the past three months, did you change the average employee compensation?	12
Do you plan to change average employee compensation during the next three months?	12

SMALL BUSINESS SURVEY QUESTIONS

PAGE IN REPORT

Are...loans easier or harder to get than they were three months ago?	13
During the last three months, was your firm able to satisfy its borrowing needs?	14
Do you expect to find it easier or harder to obtain your required financing during the next three months?	14
If you borrow money regularly (at least once every three months) as part of your business activity, how does the rate of interest payable on your most recent loan compare with that paid three months ago?	15
If you borrowed within the last three months for business purposes, and the loan maturity (pay back period) was 1 year or less, what interest rate did you pay?	15
During the last three months, did you increase or decrease your inventories?	16
At the present time, do you feel your inventories are too large, about right, or inadequate?	16
Looking ahead to the next three months to six months, do you expect, on balance, to add to your inventories, keep them about the same, or decrease them?	16
During the last six months, has your firm made any capital expenditures to improve or purchase equipment, buildings, or land?	17
If [your firm made any capital expenditures], what was the total cost of all these projects?	18
Looking ahead to the next three to six months, do you expect to make any capital expenditures for plant and/or physical equipment?	18
What is the single most important problem facing your business today?	19
Please classify your major business activity, using one of the categories of example below	20
How many employees do you have full and part-time, including yourself?	20
