NFIB SMALL BUSINESS ECONOMIC TRENDS

NFIB Research Center has collected Small Business Economic Trends Data with Quarterly surveys since 1973 and monthly surveys since 1986. The sample is drawn from the membership files of the National Federation of Independent Business (NFIB). Each was mailed a questionnaire and one reminder. Subscriptions for twelve monthly SBET issues are \$250. Historical and unadjusted data are available, along with a copy of the questionnaire, from the NFIB Research Center. You may reproduce Small Business Economic Trends items if you cite the publication name and date and note it is a copyright of the NFIB Research Center. © NFIB Research Center. ISBS #0940791-24-2. Chief Economist William C. Dunkelberg and Executive Director of the NFIB Research Center Holly Wade are responsible for the report.

SUMMARY

OPTIMISM INDEX

The Optimism Index decreased slightly in October by 0.9 points to 98.2. One of the 10 Index components improved, seven declined, and two were unchanged. The NFIB Uncertainty Index decreased 7 points to 67. Owners expecting better business conditions over the next six months decreased 4 points to a net negative 37 percent. Owners have grown pessimistic about future economic conditions as this indicator has declined 17 points over the past three months to its lowest reading since November 2012. Forty-nine percent of owners reported job openings that could not be filled, a decrease of 2 points from September. The competition for workers is making it harder to hire.

LABOR MARKETS

Forty-nine percent (seasonally adjusted) of all owners reported job openings they could not fill in the current period, down 2 points from September. The number of unfilled job openings remains far above the 48-year historical average of 22 percent. Forty-two percent have openings for skilled workers (down 4 points) and 24 percent have openings for unskilled labor (down 4 points). Fifty-nine percent of the job openings in construction are for skilled workers, down 8 points. Sixty-five percent of construction firms reported few or no qualified applicants (down 15 points). Although it is clear that there is still a “shortage” of workers, the declines hint at an easing of conditions in the labor markets. Overall, 62 percent reported hiring or trying to hire in October, down 5 points from September. Owners’ plans to fill open positions remain at record high levels, with a seasonally adjusted net 26 percent planning to create new jobs in the next three months, unchanged. Up to now, it has become increasingly harder to hire, as shown by the continued increases in job openings, reports of higher wages, and reports of few or no qualified applicants. Finding qualified employees remains a problem. Fifty-eight percent (94 percent of those hiring or trying to hire) of owners reported few or no qualified applicants for the positions they were trying to fill (up 4 points). Thirty-three percent of owners reported few qualified applicants for their open positions (down 1 point) and 25 percent reported none (down 3 points).

CAPITAL SPENDING

Fifty-six percent reported capital outlays in the last six months, up 3 points from September. A recovery in investment will be needed to spark an improvement in productivity, but this is unlikely to occur while owners remain pessimistic about future business conditions. Of those making expenditures, 40 percent reported spending on new equipment (down 3 points), 24 percent acquired vehicles (up 3 points), and 14 percent improved or expanded facilities (up 2 points). Seven percent acquired new buildings or land for expansion (up 1 point) and 12 percent spent money for new fixtures and furniture (up 2 points). Thirty-one percent plan capital outlays in the next few months, up 3 points from September and 2 points above the 48-year average. However, capital spending is still anemic relative to the recent growth in the economy.

SALES AND INVENTORIES

A net negative 4 percent of all owners (seasonally adjusted) reported higher nominal sales in the past three months, down 7 points from September. The net percent of owners expecting higher real sales volumes decreased by 2 points to a net 0 percent. The net percent of owners reporting inventory increases decreased 3 points to a net 0 percent. Thirty-nine percent of owners report that supply chain disruptions have had a significant impact on their business. Another 29 percent report a moderate impact and 21 percent report a mild impact. Only 10 percent report no impact from recent supply chain disruptions. A net 9 percent of owners viewed current inventory stocks as “too low” in October, down 1 point from September and near a record high level. A net 8 percent of owners plan inventory investment in the coming months, down 1 point from September.

COMPENSATION AND EARNINGS

Seasonally adjusted, a net 44 percent reported raising compensation. A net 32 percent plan to raise compensation in the next three months, up 2 points from September’s record high reading. Ten percent cited labor costs as their top business problem (down 2 points) and 24 percent said that labor quality was their top business problem (down 4 points). The frequency of reports of positive profit trends decreased 3 points to a net negative 17 percent. Among owners reporting lower profits, 31 percent blamed the rise in the cost of materials, 25 percent blamed weaker sales, 9 percent cited labor costs, 9 percent cited the usual seasonal change, 6 percent cited lower prices, and 3 percent cited higher taxes or regulatory costs. For owners reporting higher profits, 56 percent credited sales volumes, 17 percent cited usual seasonal change, and 11 percent cited higher prices.

CREDIT MARKETS

Two percent of owners reported that all their borrowing needs were not satisfied (unchanged). Twenty-three percent reported all credit needs met (up 3 points) and 63 percent said they were not interested in a loan (up 1 point). A net 2 percent reported their last loan was harder to get than in previous attempts (down 2 points). One percent reported that financing was their top business problem (up 1 point). A net 2 percent of owners reported paying a higher rate on their most recent loan. The average rate paid on short maturity loans was 5.0 percent, down 0.6 points from September. Twenty-three percent of all owners reported borrowing on a regular basis (up 3 points).

INFLATION

The net percent of owners raising average selling prices increased 7 points to a net 53 percent seasonally adjusted. Price raising activity has reached levels not seen since the early 1980s when prices were rising at double digit rates. Unadjusted, 6 percent (down 2 points) reported lower average selling prices and 57 percent (up 4 points) reported higher average prices. Price hikes were most frequent in wholesale (78 percent higher, 4 percent lower), retail (72 percent higher, 4 percent lower), and construction (66 percent higher, 0 percent lower). Seasonally adjusted, a net 51 percent plan price hikes (up 5 points).

COMMENTARY

The economy grew at a disappointing 2 percent rate in the third quarter, due mostly to a weakening of consumer spending. A reduction in government support payments was the major drag, but so were supply chain issues and labor shortages. New car spending collapsed over 20 percent as dealers' inventories shrunk due to production and distribution problems. A large share of the new homes sold have not been built yet due in part by labor shortages. With housing in short supply across much of the country, home prices have also advanced 20 percent. So, reduced government support, higher prices, and slowing job creation delivered a soft quarterly performance.

Adding to the muddle, Washington is having trouble putting its economic policies in place. Spending and tax policies are still up in the air, while debt ceiling problems loom larger each day. The Federal Reserve is also scrambling to reset policies to deal with growth and inflation numbers that it had not expected.

Small businesses are hanging on, trying to take advantage of current economic growth while remaining pessimistic about the course of business conditions in the near future. Not knowing the course of federal economic policies (e.g., taxes) makes it harder to make the investment expenditures that will be needed to raise worker productivity. Add to that the unclear course of the virus and associated government policies and owners face an economy filled with uncertainty that must be resolved to figure out the likely course of the economy.

NFIB RESEARCH CENTER SMALL BUSINESS ECONOMIC SURVEY

SMALL BUSINESS SURVEY QUESTIONS	PAGE IN REPORT
Do you think the next three months will be a good time for small business to expand substantially? Why?	4
About the economy in general, do you think that six months from now general business conditions will be better than they are now, about the same, or worse?	5
Were your net earnings or "income" (after taxes) from your business during the last calendar quarter higher, lower, or about the same as they were for the quarter before?	6
If higher or lower, what is the most important reason?	6
During the last calendar quarter, was your dollar sales volume higher, lower, or about the same as it was for the quarter before?	7
Overall, what do you expect to happen to real volume (number of units) of goods and/or services that you will sell during the next three months?	7
How are your average selling prices compared to three months ago?	8
In the next three months, do you plan to change the average selling prices of your goods and/or services?	8
During the last three months, did the total number of employees in your firm increase, decrease, or stay about the same?	9
If you have filled or attempted to fill any job openings in the past three months, how many qualified applicants were there for the position(s)?	9
Do you have any job openings that you are not able to fill right now?	10
In the next three months, do you expect to increase or decrease the total number of people working for you?	10
Over the past three months, did you change the average employee compensation?	11
Do you plan to change average employee compensation during the next three months?	11

SMALL BUSINESS SURVEY QUESTIONS	PAGE IN REPORT
Are...loans easier or harder to get than they were three months ago?	12
During the last three months, was your firm able to satisfy its borrowing needs?	13
Do you expect to find it easier or harder to obtain your required financing during the next three months?	13
If you borrow money regularly (at least once every three months) as part of your business activity, how does the rate of interest payable on your most recent loan compare with that paid three months ago?	14
If you borrowed within the last three months for business purposes, and the loan maturity (pay back period) was 1 year or less, what interest rate did you pay?	14
During the last three months, did you increase or decrease your inventories?	15
At the present time, do you feel your inventories are too large, about right, or inadequate?	15
Looking ahead to the next three months to six months, do you expect, on balance, to add to your inventories, keep them about the same, or decrease them?	15
During the last six months, has your firm made any capital expenditures to improve or purchase equipment, buildings, or land?	16
If [your firm made any capital expenditures], what was the total cost of all these projects?	17
Looking ahead to the next three to six months, do you expect to make any capital expenditures for plant and/or physical equipment?	17
What is the single most important problem facing your business today?	18
Please classify your major business activity, using one of the categories of example below	19
How many employees do you have full and part-time, including yourself?	19
