#### NFIB SMALL BUSINESS ECONOMIC TRENDS

NFIB Research Center has collected Small Business Economic Trends Data with Quarterly surveys since 1973 and monthly surveys since 1986. The sample is drawn from the membership files of the National Federation of Independent Business (NFIB). Each was mailed a questionnaire and one reminder. Subscriptions for twelve monthly SBET issues are \$250. Historical and unadjusted data are available, along with a copy of the questionnaire, from the NFIB Research Center. You may reproduce Small Business Economic Trends items if you cite the publication name and date and note it is a copyright of the NFIB Research Center. © NFIB Research Center. ISBS #0940791-24-2. Chief Economist William C. Dunkelberg and Executive Director of the NFIB Research Center Holly Wade are responsible for the report.

### SUMMARY

#### **OPTIMISM INDEX**

The Optimism Index decreased slightly in September by 1 point to 99.1. Three of the 10 Index components improved, five declined, and two were unchanged. The NFIB Uncertainty Index increased 5 points to 74. Owners expecting better business conditions over the next six months decreased 5 points to a net negative 33 percent. Owners have grown pessimistic about future economic conditions as this indicator has declined 21 points over the past three months to its lowest reading since December 2012. Fifty-one percent of owners reported job openings that could not be filled, an increase of 1 point from August and a 48-year record high for the third consecutive month.

#### LABOR MARKETS

Small businesses continue to struggle to find workers to fill open positions. Fifty-one percent (seasonally adjusted) of all owners reported job openings they could not fill in the current period, up 1 point from August and a record high reading for the third consecutive month. The number of unfilled job openings remains far above the 48year historical average of 22 percent. ADP data indicate that large firms are dominating the labor market, making hiring increasingly difficult for small firms. Forty-six percent have openings for skilled workers (up 2 points) and 28 percent have openings for unskilled labor (up 1 point). Sixty-seven percent of the job openings in construction are for skilled workers, up 1 point. Eighty percent of construction firms reported few or no qualified applicants (up 13 points). Overall, 67 percent reported hiring or trying to hire in September, up 1 point from August. Owners' plans to fill open positions remain at record high levels, with a seasonally adjusted net 32 percent planning to create new jobs in the next three months, down 6 points. It's becoming increasingly harder to hire, as shown by the continued increase in job openings, reports of higher wages, and few or no qualified applicants. Sixty-two percent (92 percent of those hiring or trying to hire) of owners reported few or no "qualified" applicants for the positions they were trying to fill (up 2 points). Where there are open positions, labor quality remains a significant problem. Thirty-four percent of owners reported few qualified applicants for their open positions (up 3 points) and 28 percent reported none (down 1 point).

#### CAPITAL SPENDING

Fifty-three percent reported capital outlays in the last six months, down 2 points from August, historically weak. A recovery in investment will be needed to spark an improvement in productivity, but this is unlikely to occur while owners remain pessimistic about future business conditions. Of those making expenditures, 37 percent reported spending on new equipment (down 4 points), 21 percent acquired vehicles (down 1 point), and 12 percent improved or expanded facilities (down 4 points). Six percent acquired new buildings or land for expansion (unchanged) and 10 percent spent money for new fixtures and furniture (down 2 points). Twenty-eight percent plan capital outlays in the next few months, down 2 points from August and 1 point below the 48-year average.

This survey was conducted in September 2021. A sample of 5,000 small-business owners/members was drawn. Five hundred thirty-seven (537) usable responses were received — a response rate of 11 percent.

#### SALES AND INVENTORIES

Three percent of all owners (seasonally adjusted) reported higher nominal sales in the past three months, up 3 points from August. The net percent of owners expecting higher real sales volumes improved by 4 points to a net 2 percent, a solid reversal from the past two months. The net percent of owners reporting inventory increases rose 5 points to a net 3 percent, back into positive territory after the last two months of more owners reporting declines than gains. Over 35 percent of owners report supply chain disruptions have had a significant impact on their business. Another 32 percent report a moderate impact and 21 percent report a mild impact. Only 10 percent report no impact from recent supply chain disruptions. A net 10 percent of owners viewed current inventory stocks as "too low" in September, down 1 point from August. A net 9 percent of owners plan inventory investment in the coming months, down 2 points from August but historically a very elevated reading.

#### COMPENSATION AND EARNINGS

Seasonally adjusted, a net 42 percent reported raising compensation, up 1 point from August and a 48-year record high reading. A net 30 percent plan to raise compensation in the next three months, up 4 points from August's record high reading. Twelve percent cited labor costs as their top business problem (up 2 points) and 28 percent said that labor quality was their top business problem (unchanged), both record high readings. The frequency of reports of positive profit trends increased 1 point to a net negative 14 percent. Among owners reporting lower profits, 26 percent blamed the rise in the cost of materials, 23 percent blamed weaker sales, 19 percent cited labor costs, 10 percent cited the usual seasonal change, 6 percent cited lower prices, and 6 percent cited higher taxes or regulatory costs. For owners reporting higher profits, 57 percent credited sales volumes, 19 percent cited usual seasonal change, and 5 percent cited higher prices.

#### **CREDIT MARKETS**

Two percent of owners reported that all their borrowing needs were not satisfied (unchanged). Twenty percent reported all credit needs met (down 2 points) and 62 percent said they were not interested in a loan (down 1 point). A net 4 percent reported their last loan was harder to get than in previous attempts (up 1 point). Zero percent reported that financing was their top business problem (down 1 point). A net 0 percent of owners reported paying a higher rate on their most recent loan, down 2 points from August. The average rate paid on short maturity loans was 5.6 percent, up 1 point from August. Loan rates continue to be consistently low. Twenty percent of all owners reported borrowing on a regular basis (unchanged).

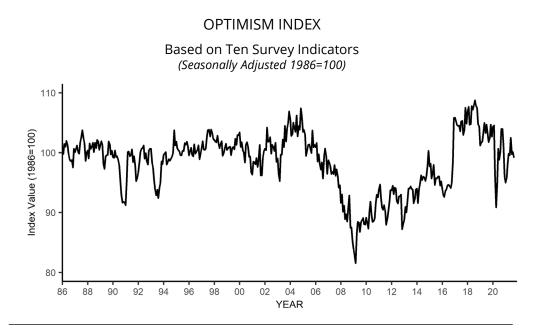

#### INFLATION

The net percent of owners raising average selling prices decreased 3 points to a net 46 percent seasonally adjusted. Unadjusted, 8 percent (up 4 points) reported lower average selling prices and 53 percent (up 1 point) reported higher average prices. Price hikes were most frequent in wholesale (75 percent higher, 0 percent lower), manufacturing (67 percent higher, 4 percent lower), and retail (71 percent higher, 2 percent lower). Seasonally adjusted, a net 46 percent plan price hikes (up 2 points).

## COMMENTARY

The fourth quarter is underway, but it's going to be a rocky one. Covid continues to "rule the roost," as the President announces proposed mandates which will make it more difficult for firms to operate. Many people are still reluctant to take a job due to Covid risks, especially those more public facing jobs such as restaurants. Supply chains are still in disarray, with ships and containers piling up on the coasts but only slowly being unloaded and distributed to businesses as truck drivers are in short supply. Inflation is running strong but the Federal Reserve is only running away. Congress still doesn't have a budget and the debt ceiling is about to be hit.

Owners are doing their best to meet the needs of customers, but are unable to hire workers or receive needed supplies and inventories. Plans to hire and increase inventories are strong, needed to meet current demand. However plans to make capital investments are depressed as the outlook for business conditions in the future are not very positive. Owners are clearly trying to hire, but are not being very successful in spite of paying higher wages. In the meantime, inflation is squeezing profits (the major source of operating capital for small firms) so firms are raising selling prices. Just what policies Washington will follow remains uncertain, and so does the future.

#### **OPTIMISM INDEX**

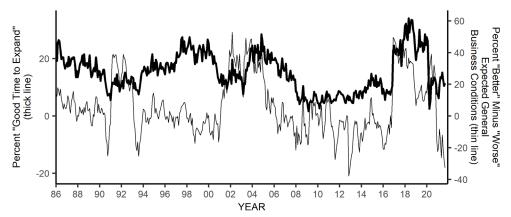

Based on Ten Survey Indicators (Seasonally Adjusted 1986=100)

	Jan	Feb	Mar	Apr	Мау	Jun	Jul	Aug	Sep	Oct	Nov	Dec

### NFIB RESEARCH CENTER SMALL BUSINESS ECONOMIC SURVEY

SMALL BUSINESS SURVEY QUESTIONS	Page in Report
Do you think the next three months will be a good time for small business to expand substantially? Why?	4
About the economy in general, do you think that six months from now general business conditions will be better than they are now, about the same, or worse?	5
Were your net earnings or "income" (after taxes) from your business during the last calendar quarter higher, lower, or about the same as they were for the quarter before?	6
If higher or lower, what is the most important reason?	6
During the last calendar quarter, was your dollar sales volume higher, lower, or about the same as it was for the quarter before?	7
Overall, what do you expect to happen to real volume (number of units) of goods and/or services that you will sell during the next three months?	7
How are your average selling prices compared to three months ago?	8
In the next three months, do you plan to change the average selling prices of your goods and/or services?	8
During the last three months, did the total number of employ in your firm increase, decrease, or stay about the same?	
If you have filled or attempted to fill any job openings in the past three months, how many qualified applicants were there for the position(s)?	9
Do you have any job openings that you are not able to fill right now?	10
In the next three months, do you expect to increase or decrease the total number of people working for you?	10
Over the past three months, did you change the average employee compensation?	11
Do you plan to change average employee compensation during the next three months?	11

SMALL BUSINESS SURVEY QUESTIONS	Page in Report
Areloans easier or harder to get than they were three months ago?	12
During the last three months, was your firm able to satisfy its borrowing needs?	13
Do you expect to find it easier or harder to obtain your required financing during the next three months?	13
If you borrow money regularly (at least once every three months) as part of your business activity, how does the rate of interest payable on your most recent loan compare with that paid three months ago?	14
If you borrowed within the last three months for business purposes, and the loan maturity (pay back period) was 1 year or less, what interest rate did you pay?	14
During the last three months, did you increase or decrease your inventories?	15
At the present time, do you feel your inventories are too large, about right, or inadequate?	15
Looking ahead to the next three months to six months, do you expect, on balance, to add to your inventories, keep them about the same, or decrease them?	15
During the last six months, has your firm made any capital expenditures to improve or purchase equipment, buildings, or land?	16
If [your firm made any capital expenditures], what was the total cost of all these projects?	17
Looking ahead to the next three to six months, do you expect to make any capital expenditures for plant and/or physical equipment?	. 17
What is the single most important problem facing your business today?	18
Please classify your major business activity, using one of the categories of example below	. 19
How many employees do you have full and part-time, including yourself?	19
